

FOR IMMEDIATE RELEASE

OPENTV ANNOUNCES PARTICIPATION IN CABLELABS OPENCABLE INITIATIVE

San Francisco, June 7, 2006 – OpenTV Corp. (NASDAQ NMS: OPTV), a leading provider of enabling technologies for advanced digital television services, today announced that it has agreed to participate in CableLabs® North American-focused OpenCable™ initiative, and has agreed to become a contributor to that effort.

"Our participation at CableLabs will let us play a more significant role in helping the cable industry accelerate the adoption and deployment of advanced digital television services," said Jim Chiddix, CEO, OpenTV. "By coupling OpenTV's experience with our commitment to the deployment of innovative digital solutions, we believe that consumers and operators will best be served by our full participation with CableLabs and our collective efforts to develop next generation advanced television services."

The OpenCable Project was established by CableLabs and its member companies to develop a family of specifications to define interoperable digital cable television devices, and an associated interoperable software / middleware application platform known as OCAP™, as well as related test materials. With an increased focus on the North American cable market, OpenTV intends to work closely with CableLabs, and other MSOs, to accelerate the development of advanced digital television services. OpenTV brings a wealth of experience and intellectual property to the CableLabs effort, with more than 450 issued patents around the world and over 30 network operators having deployed its software solutions.

"We are excited that OpenTV, with its vast experience as an innovator in this space, has decided to support CableLabs in this very important initiative," said Dr. Richard R. Green, President and CEO, CableLabs. "We expect OpenTV to be an active participant in our efforts and look forward, now with OpenTV's help, to accelerating market acceptance and deployment of advanced digital television services."

About Open TV

OpenTV is one of the world's leading providers of technologies and services enabling the delivery of digital and interactive television. The company's software has been integrated in over 67 million digital set-top-boxes in 96 countries. The software enables enhanced television, interactive shopping, interactive and addressable advertising, games and gaming, personal video recording, and a variety of consumer care and communication applications.
